

Assignment Q1) Add Two Number

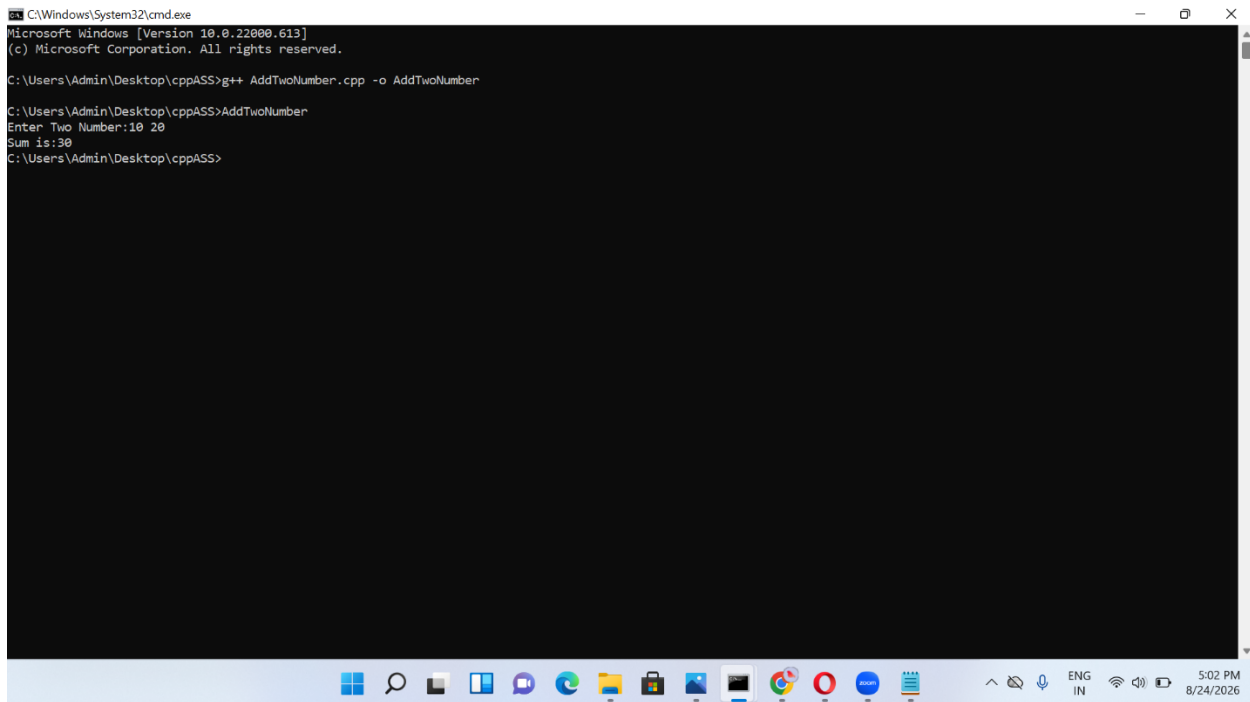

The screenshot shows a Windows desktop environment. In the foreground, a Notepad window titled "AddTwoNumber - Notepad" is open, displaying the following C++ code:

```
File Edit Format View Help
C:\U... #include <iostream>
C:\U... using namespace std;
Enter... int main()
Sum : {
C:\U...     int a,b;
        cout <<"Enter Two Number:";
        cin >> a >> b;

        cout <<"Sum is:" << a + b;

        return 0;
}
```

The status bar at the bottom of the Notepad window indicates "Ln 7, Col 6", "100%", "Windows (CRLF)", and "UTF-8". In the background, a Command Prompt window is visible, showing the compilation and execution of the program.

The screenshot shows a Windows Command Prompt window titled "C:\Windows\System32\cmd.exe". The prompt displays the following commands and output:

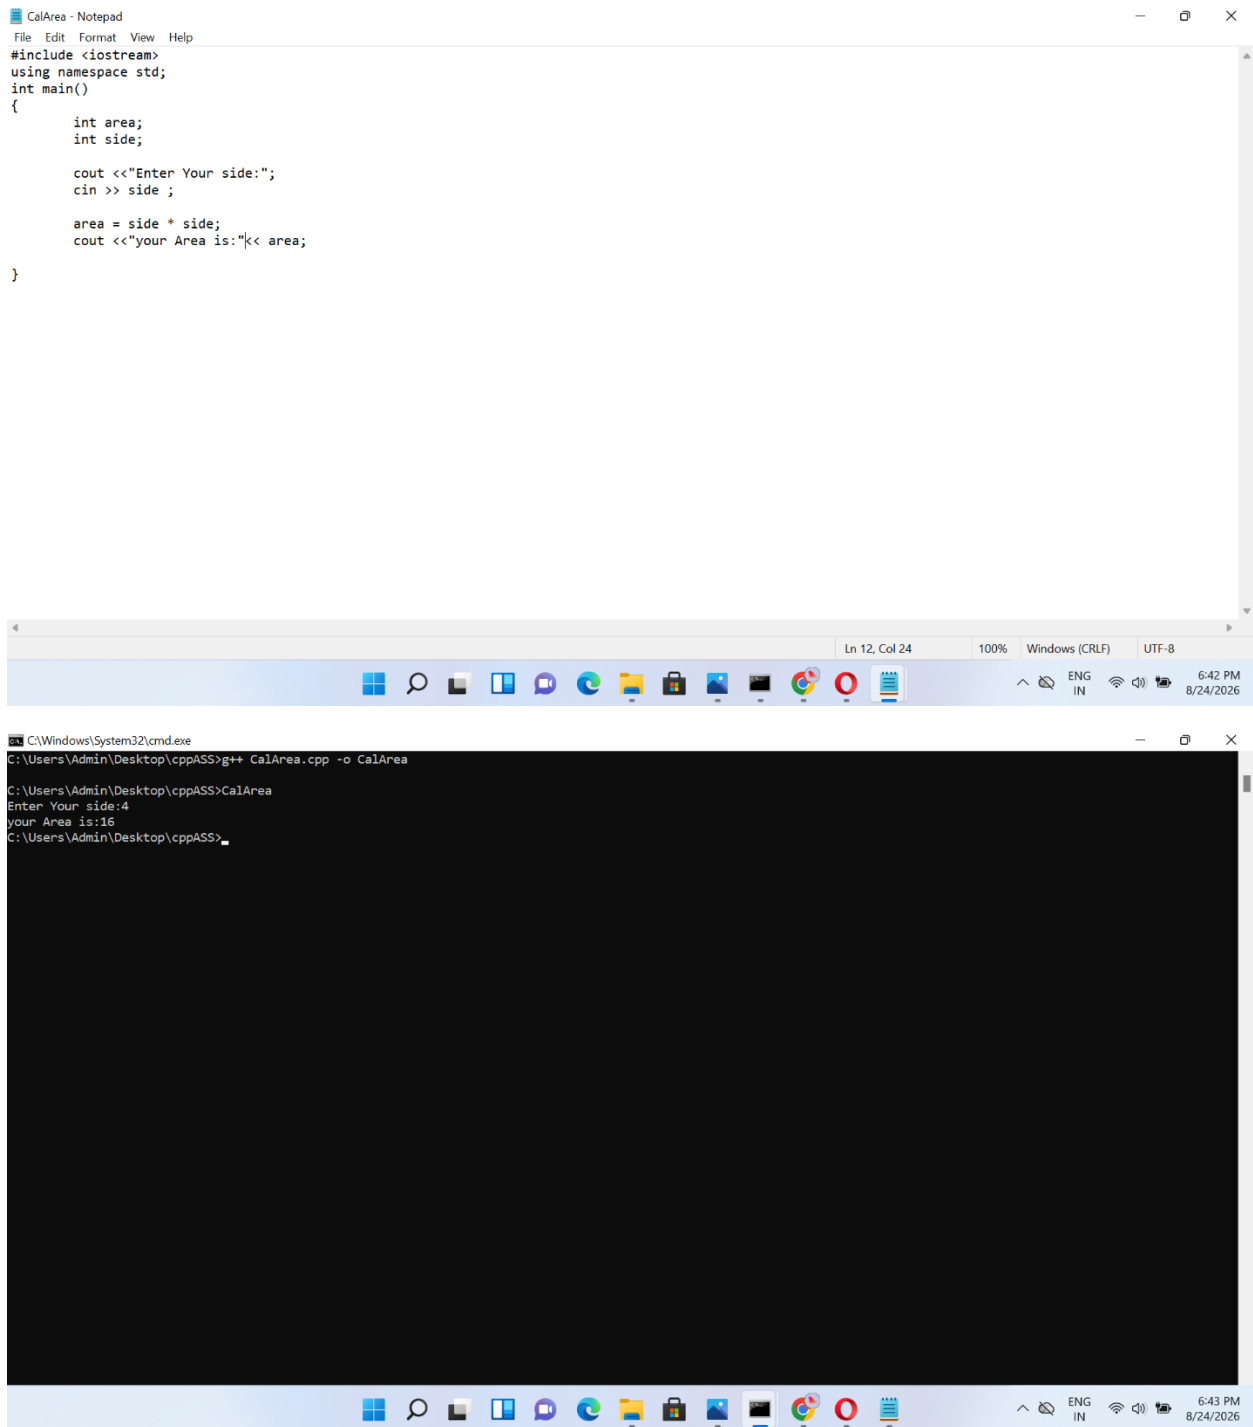

```
Microsoft Windows [Version 10.0.22000.613]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Admin\Desktop\cppASS>g++ AddTwoNumber.cpp -o AddTwoNumber

C:\Users\Admin\Desktop\cppASS>AddTwoNumber
Enter Two Number:10 20
Sum is:30
C:\Users\Admin\Desktop\cppASS>
```

The status bar at the bottom of the Command Prompt window shows system icons and the time "5:02 PM 8/24/2026".

Q2) Area Calculation

The image shows a C++ program in a Notepad window and its execution in a command prompt. The program calculates the area of a square based on user input. The Notepad window title is 'CalArea - Notepad'. The code is as follows:

```
File Edit Format View Help
#include <iostream>
using namespace std;
int main()
{
    int area;
    int side;

    cout <<"Enter Your side:";
    cin >> side ;

    area = side * side;
    cout <<"your Area is:"<< area;

}
```

The command prompt window title is 'C:\Windows\System32\cmd.exe'. The command executed is 'C:\Users\Admin\Desktop\cppASS>g++ CalArea.cpp -o CalArea'. The output shows the program running and calculating the area for a side length of 4, resulting in 16.

```
C:\Windows\System32\cmd.exe
C:\Users\Admin\Desktop\cppASS>g++ CalArea.cpp -o CalArea

C:\Users\Admin\Desktop\cppASS>CalArea
Enter Your side:4
your Area is:16
C:\Users\Admin\Desktop\cppASS>
```

Q3) Swap Two Number

```
SwapNum - Notepad
File Edit Format View Help
#include <iostream>
using namespace std;
int main()
{
    int a,b;
    int temp;

    cout << " Enter Your Number: ";
    cin >> a >> b;

    temp = a;
    a = b;
    b = temp;

    cout << "after swapping " << a << " " << b << endl;
    return 0;
}
```

```
C:\Windows\System32\cmd.exe
C:\Users\Admin\Desktop\cppASS>g++ SwapNum.cpp -o SwapNum
SwapNum.cpp: In function 'int main()':
SwapNum.cpp:15:54: error: expected primary-expression before ';' token
   15 |         cout << "after swapping " << a << " " << b <<;
      |                                                     ^
SwapNum.cpp:16:16: error: 'o' was not declared in this scope
   16 |         return o;
      |                ^
C:\Users\Admin\Desktop\cppASS>g++ SwapNum.cpp -o SwapNum
C:\Users\Admin\Desktop\cppASS>SwapNum
Enter Your Number: 45
89
after swapping 89 45
C:\Users\Admin\Desktop\cppASS>
```

Q4) Calculate Power

```
CalculatePower - Notepad
File Edit Format View Help
#include <iostream>
using namespace std;
int main()
{
    int base,exponent;
    int result = 1;
    cout << "Enter base and Exponent:";
    cin >> base >> exponent;

    for ( int i = 1; i<=exponent;i++){
        result = result*base;
    }

    cout <<"Power=" <<result;
    return 0;
}

Ln 10, Col 17    100%    Windows (CRLF)    UTF-8

C:\Windows\System32\cmd.exe
Enter base and Exponent:2 5
Power=1
C:\Users\Admin\Desktop\cppASS>g++ CalculatePower.cpp -o CalculatePower

C:\Users\Admin\Desktop\cppASS>CalculatePower
Enter base and Exponent:2 5
Power=32
C:\Users\Admin\Desktop\cppASS>
```

Q5) Calculate Simple interest

```
SI - Notepad
File Edit Format View Help
#include <iostream>
using namespace std;
int main()
{
    float p,r,t,SimpleInterest;

    cout <<"Enter Principle:";
    cin >> p;

    cout <<"Enter Rate:";
    cin >> r;

    cout <<"Enter Time:";
    cin >> t;

    SimpleInterest =(p*r*t)/100;

    cout <<"SimpleInterest:" << SimpleInterest;
}

Ln 18, Col 25 100% Windows (CRLF) UTF-8 7:13 PM 8/24/2026
```

Q6) Calculate Compound Interest

```
CompoundInterest - Notepad
File Edit Format View Help
#include <iostream>
#include <cmath>
using namespace std;

int main()
{
    float p,r,t,a,compoundInterest;

    cout << "Enter Principle Amount:";
    cin >> p;

    cout <<"Enter Rate:";
    cin >> r;

    cout <<"Enter Time:";
    cin >> t;

    a = p * pow(1 + r/100,t);
    compoundInterest = a - p;

    cout << "compound Interest =" << compoundInterest;

    return 0;
}

Ln 1, Col 2 100% Windows (CRLF) UTF-8 6:21 PM 8/24/2026
```
